Important Health Warning About Playing Video Games

Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these “photosensitive epileptic seizures” while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

ESRB Game Ratings

The Entertainment Software Rating Board (ESRB) ratings are designed to provide consumers, especially parents, with concise, impartial guidance about the age-appropriateness and content of computer and video games. This information can help consumers make informed purchase decisions about which games they deem suitable for their children and families.

ESRB ratings have two equal parts:

- **Rating Symbols** suggest age appropriateness for the game. These symbols appear on the front of virtually every game box available for retail sale or rental in the United States and Canada.
- **Content Descriptors** indicate elements in a game that may have triggered a particular rating and/or may be of interest or concern. The descriptors appear on the back of the box next to the rating symbol.

For more information, visit www.ESRB.org.

Press the “<” Key to view and manage each of your Skylanders in the “Skylander Info” menu.

The “Stats” tab will allow you to view and track the progress of your Skylander’s abilities.

- You can increase your Skylander’s maximum health by collecting Victory Points when defeating enemies.
- Find the adventurer Cali in the Ruins to participate in her Heroic Challenges to further boost your other stats.
- Your Hero Level is your heroic progress on the *Skylanders Spyro’s Universe*SM Website!

The “Powers” tab allows you to view which upgrades your Skylander has acquired.

Use the “Manage” tab to customize your Skylander.

- **Nicknames:** Each Skylander can have a nickname that will be displayed in place of their standard name.
- **Hats:** As you progress through the game, look out for hidden gift boxes containing stylish Skylander Hats that boost your stats. Any Skylander can wear any Hat.
- **Ownership:** This option allows you to take ownership of a visiting Skylander to add it to your collection.
- **Web Code:** Each Skylander has their own unique web code based on their current stats and level. Each web code can be used to update your Skylander online in *Skylanders Spyro’s Universe*.
- **Reset:** Want to try a different upgrade path? This option will reset any Skylander back to level 1, removing its Victory Points, Upgrades, and Currency.

PLAYING THE GAME

UPGRADES

In the Ruins the user can visit the fairy Persephone and purchase upgrades with collected currency.

ELEMENTAL CLASSES

Each Skylander possesses the power of one of 8 Elemental Classes. The Elemental Classes include:

Air

Life

Undead

Earth

Fire

Water

Magic

Tech

ELEMENTAL GATES

Throughout Skylands, there are Elemental Gates that only Skylanders of that element can open. Inside are special areas containing new challenges, collectibles and other rewards for you to discover!

CO-OP PLAY

In order to play Co-op, Player 1 must first already be playing the game with a Controller plugged into an available port. During Adventure Mode, a second player can join the game by plugging a second Controller into a different port and then pressing the "Primary Attack" Button on their Controller. A second Skylander must then be placed on the *Portal of Power*. To drop out of the gameplay, Player 1 or Player 2 must remove their Skylander from the *Portal of Power*, and then press the "Special Attack" Button on their Controller.

BATTLE MODE

Choose from a variety of Battle Mode arenas and have a brawl against a friend. Use the items, traps and jump pads to your advantage as you try to become the ultimate Portal Master. Challenge a friend in three different head-to-head modes:

Arena Rumble: A head-to-head battle to determine who will reign supreme.

SkyGoals: Outscore your opponent! Pick up the ball, then carry it to the goal or throw it using the Throw Command. Force fumbles by attacking.

SkyGem Master: Be the first to collect five gems! Make your opponent drop gems by hitting them with an attack.

When prompted, place Player 1's and then Player 2's Skylanders on the *Portal of Power*. Note that both must remain on the *Portal of Power* during Battle Mode. In Player Vs Player, some elements are stronger against other elements - experiment and find out!

MATCH SETTINGS MENU

1. **Restore Health** – After a round, your Skylander is fully healed.
2. **Powerups** – Boost items are added in the fight.
3. **Food** – Food is dropped to heal your Skylander.
4. **Arena Hazards** – Toggle the option on to add dangerous traps to ensnare your opponent.
5. **Fair Fight** – Toggle the option on to remove all Skylander levels and balance upgrades for the duration of the fight.
